of high yield securities.

Goldman Sachs Asset Management

Market Review

Dear Shareholder:

During the one-year reporting period there were mixed signals on the economic front and a host of issues affecting the financial markets. As is typically the case during periods of uncertainty, this proved to be a positive backdrop for the fixed income markets.

■ From Recovery to Uncertainty — As the fiscal year began in November of 2001, the events of September 11 continued to reverberate throughout the world. As a result, a rapid end to the first global recession in a decade appeared unlikely. In an effort to stabilize the economy, the Federal Reserve Board (the "Fed") reduced short-term interest rates aggressively during the fourth quarter of 2001, bringing the federal funds rate to 1.75% — its lowest level since the Kennedy Administration. Low interest rates and attractive finance incentives stimulated consumer spending, driving housing and auto sales to record levels. They also led to a sharp increase in mortgage refinancing, which had the effect of putting more cash in consumers' pockets.

Robust consumer spending combined with declining oil prices and the rapid success of U.S. armed forces in Afghanistan boosted investor confidence in the fourth quarter of 2001. During that period gross domestic product ("GDP") grew 2.7%, reversing the 0.3% contraction from the previous quarter. In a surprising show of strength, GDP for the first quarter of 2002 grew at a rate of 5.0% — driven largely by increases in manufacturing production orders, as companies that had previously cut production in the face of falling demand began to rebuild depleted inventories. However, this positive news was overshadowed by the series of highly publicized accounting scandals. Downside earnings guidance from companies across a range of sectors contributed to the woes in the equity markets, as did news of a sharp decline in GDP growth for the second quarter, which grew only 1.3%. While the revised estimate for third quarter 2002 GDP is 4.0%, many economists are projecting that growth during the last quarter of 2002 will fall back to the 1-2% range.

Acknowledging that consumer and business confidence was wavering, the Fed moved into action in early November by lowering the federal funds rate to 1.25%, a 41-year low. In his November 13, 2002 testimony to the Joint Economic Committee of Congress, Fed Chairman Alan Greenspan acknowledged that several forces have continued to weigh on the economy, including heightened geopolitical risks, the fallout from corporate accounting scandals, and the continued reluctance of businesses to increase their investment spending. The Fed moved its economic bias to neutral at its November meeting, citing that risks to the economy are balanced between slow growth and inflation.

■ Positive Results for High Quality Fixed Income Securities; Volatility in the Corporate and High Yield Markets — The very elements that contributed to the severe weakness in the equity markets aided the fixed income markets overall during the reporting period. While fixed income securities experienced their share of volatility — due in part to mixed signals on the economic front — their prices in both the U.S. and abroad generally rose. The combination

NOT FDIC-INSURED

May Lose Value

No Bank Guarantee

of falling interest rates and increased demand from investors seeking "safer havens" amid the turmoil in the equity markets contributed to price gains in high quality sectors such as government securities.

An exception was in the corporate bond market, where a confluence of negative events including high profile corporate scandals, volatile rating agency behavior, and poor equity markets combined to drive corporate spreads out to historically wide levels.

Looking ahead, we believe the economy is positioned for a gradual recovery over the next 12 months. With interest rates at historic lows and inflation in check, a solid foundation is in place for future growth. However, a number of uncertainties exist, including the current geopolitical landscape.

As always, we appreciate your investment in the Goldman Sachs Funds and look forward to continuing to serve your financial needs in the years to come.

Sincerely,

اليسماداً الما سو David W. Blood

What Distinguishes Goldman Sachs' Fixed Income Investing Process?

At Goldman Sachs Asset Management, the goal of our fixed income investment process is to provide consistent, strong performance by actively managing our portfolios within a research-intensive, risk-managed framework.

Fund is to generate risk

Goldman Sachs High Yield

adjusted returns by

minimizing default losses

and focusing on issues with

strong upside potential.

A key element of our fixed income investment philosophy is to evaluate the broadest global opportunity set to capture relative value across sectors and instruments. Our globally integrated investment process involves managing dynamically along the risk/return spectrum, as we continue to develop value-added strategies through:

1 RIGOROUS SECURITY SELECTION

- Assess relative value among sectors (such as mortgages and corporates) and sub-sectors
- Leverage the vast resources of Goldman Sachs in selecting securities for each portfolio

2 PRECISE PORTFOLIO CONSTRUCTION

- Team approach to decision making
- Manage risk by avoiding significant sector and interest rate bets
- Careful management of yield curve strategies while closely managing portfolio duration

RESULT

Fixed Income portfolios that:

- Include domestic and global investment options, tax-free income opportunities, and access to areas of specialization such as high yield
- Capitalize on Goldman Sachs' industry renowned credit research capabilities
- Use a risk-managed framework to seek total return, recognizing the importance of investors' capital accumulation goals as well as their need for income

November 1, 2001— October 31, 2002	Fund Total Return (based on NAV)¹	30-Day Standardized Yield²	Lehman Brothers U.S. Corporate High Yield Bond Index ³
Class A	-2.98%	10.37%	-5.48%
Class B	-3.56	10.09	-5.48
Class C	-3.57	10.10	-5.48
Institutional	-2.59	11.28	-5.48
Service	-2.93	10.76	-5.48

¹ The net asset value (NAV) represents the net assets of the class of the Fund (ex-dividend) divided by the total number of shares of the class outstanding. The Fund's performance assumes the reinvestment of dividends and other distributions. The Fund's performance does not reflect the deduction of any applicable sales charges.

³ The Lehman Brothers U.S. Corporate High Yield Bond Index is a total return performance benchmark for fixed income securities having a maximum quality rating of Ba1 (as determined by Moody's Investors Service), a minimum amount outstanding of \$100 million and at least one year to maturity. The Index is unmanaged and does not reflect any deduction for fees, expenses or taxes.

STANDARDIZED TOTAL RETURNS ⁴							
For the period ended 9/30/02	Class A	Class B	Class C	Institutional	Service		
One Year	-2.07%	-3.18%	0.75%	2.94%	2.43%		
Five Years	-0.07	-0.30	0.10	1.24	0.74		
Since Inception	0.29 (8/1/97)	0.27 (8/1/97)	0.47 (8/15/97)	1.59 (8/1/97)	1.09 (8/1/97)		

⁴ The Standardized Total Returns are average annual total returns as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. These returns reflect a maximum initial sales charge of 4.5% for Class A Shares, the assumed contingent deferred sales charge for Class B Shares (5% maximum declining to 0% after six years) and the assumed contingent deferred sales charge for Class C Shares (1% if redeemed within 12 months of purchase). Because Institutional and Service Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.

Total return figures in the above charts represent past performance and do not indicate future results, which will vary. The investment return and principal value of an investment will fluctuate and, therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Performance reflects expense limitations in effect. In their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

² The 30-Day Standardized Yield of the Fund is calculated by dividing the net investment income per share (as defined by securities industry regulations) earned by the Fund over a 30-day period (ending on the stated monthend date) by the maximum public offering price per share of the Fund on the last day of the period. This number is compounded semiannually and then annualized. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders.

⁵ The Fund is actively managed and, as such, its composition may differ over time.

^{*}Note: Reflects NRSRO (nationally recognized statistical rating organization) rating or internal rating if not rated.

Portfolio Results

Dear Shareholder:

This report provides an overview on the performance of the Goldman Sachs High Yield Fund for the one-year period that ended October 31, 2002.

Performance Review

Over the one-year period that ended October 31, 2002, the Fund's Class A, B, C, Institutional, and Service Shares generated cumulative total returns, without sales charges, of -2.98%, -3.56%, -3.57%, -2.59%, and -2.93%, respectively. These returns compare favorably to the -5.48% cumulative total return of the Fund's benchmark, the Lehman Brothers U.S. Corporate High Yield Bond Index.

High Yield Market

The high yield market was extremely volatile over a reporting period that witnessed an unprecedented crisis of confidence in corporate governance, concerns about the global economy, and high profile bankruptcies. In the first part of the reporting period, high yield prices surged to pre-September 11 levels as investors returned to the market. Indeed, the continuing strength in demand muted the market's reaction to the well-publicized Enron and Global Crossing debacles, as the two events were seemingly treated as isolated incidents. As 2002 began, this positive momentum continued, spurred on by increasingly encouraging economic news. Notably, bonds of cyclical companies rallied strongly. The primary clouds on the horizon were the collapse of a number of already-stressed Telecom companies, and an increasingly aggressive stance on downgrades by the rating agencies.

Fears over systemic risk from poor accounting practices soon began to rise following the discovery of complex fraud at cable company Adelphia in April 2002, and subsequently at WorldCom in June 2002. Liquidity at very large corporate issuers became a key issue, as high profile companies lost access to the commercial paper markets and were forced to draw on bank "back-stop" facilities. A plethora of "fallen angels," or companies downgraded from investment grade to high yield, overwhelmed the ability of the high yield market to absorb them. As the market grappled with these credits — predominantly in the Utility, Media and Telecom industries — it effectively shut the door to new high yield issuance.

The situation began to stabilize in August 2002, following the announcement that only a relatively small number of companies' corporate officers were unable to sign-off on their financial statements. However, the high yield market was again weak following the general direction of the equity market due to renewed concerns over economic weakness. The relief of companies meeting their (albeit reduced) earnings guidance finally brought buyers back to the market. High yield securities subsequently began a vigorous rally at the end of the reporting period, spurred on by several major bond repurchase programs and a broader corporate focus on balance sheet de-leveraging.

Investment Objective

The Fund seeks a high level of current income and may also consider the potential for capital appreciation. The Fund invests primarily in high yield, fixed income securities rated, at the time of investment, below investment grade.

Portfolio Composition

As of October 31, 2002, the Fund was diversified among over 300 issues. Holdings in the top 10 companies represented 14.8% of the portfolio.

Our strategy of portfolio construction based on credit fundamentals was unchanged over the reporting period. We continued to focus on industrial companies with solid asset values. While the Fund produced a negative return during the period, it outperformed its benchmark. The Fund established a number of new positions from the primary market in both the U.S. and Europe during the reporting period. Given the volatility in the high yield market we had the opportunity to selectively add to these positions when their prices fell. We felt this was a prudent strategy, given our longer-term convictions in these holdings. In addition, we were able to take advantage of the technical dislocations in investment grade and crossover names to build exposures at discount to par.

Portfolio Highlights

- Nextel Nextel is a business-focused wireless telecom provider. Its bonds traded down to the low 50s (half their par value) in September 2002 based on concerns about its absolute levels of debt and perceived distress among investment grade competitors. However, Nextel's bonds have rebounded close to par, as astute management negotiated the exchange of over \$2.5 billion of debt and preferred securities for equity and cash, cutting overall debt by 10%. This process has been facilitated by superior operating performance.
- Invensys BBB/Ba1 rated Invensys is a diversified industrial control and automation manufacturer. Exacerbated by a cyclical downturn, Invensys has been a casualty of an overaggressive acquisition strategy. However, experienced new management has met its debt reduction target by selling assets at attractive prices. Management has stated repeatedly that it is reluctant to issue in the high yield market. We expect Invensys to refinance its bank debt in the coming years. However, the timing may be influenced if management can regain an investment grade rating from Moody's.
- Owens-Illinois Glass packager Owens-Illinois is a long-established name in the high yield market. Downgraded to high yield on the back of asbestos concerns, its seasoned management has sought to extend maturities, issuing bonds twice in 2002. Asbestos payouts appear to be contained and the firm continues to deliver strong operating performance.

Portfolio Outlook

We remain constructive on the high yield market over the medium term. Although the economic outlook remains unclear, corporate securities should continue to benefit from low interest rates and an ongoing focus on cost reduction. We believe this will particularly benefit weaker credits that are striving to maintain liquidity until their operating environments improve. Further downgrades of investment grade companies are expected to slow, absent those companies whose bonds already trade at stressed levels. In addition, more companies are expected to enhance liquidity by replacing amortizing bank debt with bond issues.

We thank you for your investment and look forward to your continued confidence.

Goldman Sachs High Yield Investment Management Team

November 15, 2002

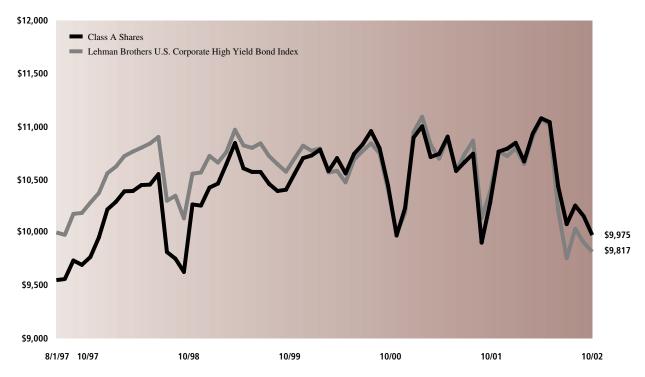

Performance Summary

October 31, 2002

The following graph shows the value, as of October 31, 2002, of a \$10,000 investment made on August 1, 1997 (commencement of operations) in Class A Shares (with the maximum sales charge of 4.5%) of the Goldman Sachs High Yield Fund. For comparative purposes, the performance of the Fund's benchmark, the Lehman Brothers U.S. Corporate High Yield Bond Index, is shown. This performance data represents past performance and should not be considered indicative of future performance which will fluctuate with changes in market conditions. These performance fluctuations will cause an investor's shares, when redeemed, to be worth more or less than their original cost. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Performance of Class B, Class C, Institutional and Service Shares will vary from Class A Shares due to differences in fees and loads.

High Yield Fund's Lifetime Performance

- † Security is exempt from registration under Rule 144A of the Securities Act of 1933. Such security may be resold, normally to qualified institutional buyers in transactions exempt from registration. The market value of 144A securities amounted to \$112,704,437, which represents 7.2% of net assets as of October 31, 2002
- @ Security is issued with a zero coupon. The interest rate disclosed for this security represents effective yield to maturity.
- § These securities are issued with a zero coupon or dividend rate which increases to the stated rate at a set date in the future.
- \in The principal amount of each security is stated in the currency in which the bond is denominated. See below.

DEM = German Mark

EUR = Euro Currency

GBP = Great Britain Pound

- # Variable rate security. Coupon rate disclosed is that which is in effect at October 31, 2002.
- ‡ Pay-in-kind securities.
- * Non-income producing security.
- ∧ Joint repurchase agreement was entered into on October 31, 2002.
- \triangle Security currently in default.
- ∅ Fair valued security.

Security ratings are obtained from Standard & Poor's/Moody's Investors Service and are unaudited.

The percent shown for each investment category reflects the value of investments in that category as a percentage of total net assets.

Notes to Financial Statements

October 31, 2002

1. ORGANIZATION

Goldman Sachs Trust (the "Trust") is a Delaware business trust registered under the Investment Company Act of 1940 (as amended) as an open-end, management investment company. The Trust includes the Goldman Sachs High Yield Fund (the "Fund"). The Fund is a diversified portfolio offering five classes of shares — Class A, Class B, Class C, Institutional and Service.

The Fund invests primarily in non-investment grade fixed-income securities which are considered predominantly speculative by traditional investment standards. Non-investment grade fixed-income securities and unrated securities of comparable credit quality (commonly known as "junk bonds") are subject to the increased risk of an issuer's inability to meet principal and interest obligations. These securities, also referred to as high yield securities, may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, generally negative perceptions of the junk bond markets and less secondary market liquidity.

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that may affect the reported amounts. Actual results could differ from those estimates.

- A. Investment Valuation Portfolio securities for which accurate market quotations are readily available are valued on the basis of quotations furnished by a pricing service or provided by dealers in such securities. Short-term debt obligations maturing in sixty days or less are valued at amortized cost. Portfolio securities for which accurate market quotations are not readily available are valued based on yield equivalents, pricing matrices or other sources, under valuation procedures established by the Trust's Board of Trustees. In addition, the impact of events that occur after the publication of market quotations used by a Fund to price its securities but before the close of regular trading on the New York Stock Exchange will not be reflected in a Fund's next determined NAV unless the Trust, in its discretion, determines to make an adjustment in light of the nature and significance of the event, consistent with applicable regulatory guidance.
- B. Security Transactions and Investment Income Security transactions are recorded as of the trade date. Realized gains and losses on sales of portfolio securities are calculated using the identified cost basis. Interest income is recorded on the basis of interest accrued, net of foreign withholding taxes and reclaims, where applicable. Market discounts, original issue discount and market premiums on debt securities are amortized to interest income over the life of the security with a corresponding adjustment in the cost basis of that security. Net investment income (other than class specific expenses), unrealized and realized gains or losses are allocated daily to each class of shares of the Fund based upon the relative proportion of net assets of each class.
- C. Federal Taxes It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, no federal tax provision is required. Income distributions are declared daily and paid monthly. Capital gain distributions, if any, are declared and paid annually.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with income tax rules. Therefore, the source of the Fund's distributions may be shown in the accompanying financial statements as either from net investment income or net realized gain on investment transactions, or from paid-in capital, depending on the type of book/tax differences that may exist.

Notes to Financial Statements (continued)

October 31, 2002

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Expenses — Expenses incurred by the Trust that do not specifically relate to an individual fund of the Trust are allocated to the funds on a straight-line or pro rata basis depending upon the nature of the expense.

Class A, Class B and Class C Shares bear all expenses and fees relating to their respective Distribution and Service Plans. Service Shares bear all expenses and fees relating to their Service and Shareholder Administration Plans. Each class of shares separately bears its respective class-specific transfer agency fees.

- E. Deferred Organization Expenses Organization-related costs are amortized on a straight-line basis over a period of five years. At October 31, 2002, deferred organization costs have been fully amortized.
- F. Foreign Currency Translations The books and records of the Fund are maintained in U.S. dollars. Amounts denominated in foreign currencies are translated into U.S. dollars on the following basis (i) investment valuations, foreign currency and other assets and liabilities initially expressed in foreign currencies are converted each business day into U.S. dollars based upon current exchange rates; (ii) purchases and sales of foreign investments, income and expenses are converted into U.S. dollars based upon currency exchange rates prevailing on the respective dates of such transactions.

Net realized and unrealized gain (loss) on foreign currency transactions will represent: (i) foreign exchange gains and losses from the sale and holdings of foreign currencies and the sale of foreign denominated debt obligations; (ii) gains and losses between trade date and settlement date on investment securities transactions and forward exchange contracts; and (iii) gains and losses from the difference between amounts of dividends, interest and foreign withholding taxes recorded and the amounts actually received.

- G. Segregation Transactions The Fund may enter into certain derivative transactions to seek to increase total return. Forward foreign currency exchange contracts, futures contracts, written options, mortgage dollar rolls, when-issued securities and forward commitments represent examples of such transactions. As a result of entering into those transactions, the Fund is required to segregate liquid assets on the accounting records equal to or greater than the market value of the corresponding transactions.
- H. Repurchase Agreements Repurchase agreements involve the purchase of securities subject to the seller's agreement to repurchase them at a mutually agreed upon date and price. During the term of a repurchase agreement, the value of the underlying securities held as collateral, including accrued interest, is required to equal or exceed the value of the repurchase agreement, including accrued interest. The underlying securities for all repurchase agreements are held in safekeeping at the Fund's custodian or designated subcustodians.

3. AGREEMENTS

Pursuant to the Investment Management Agreement (the "Agreement"), Goldman Sachs Asset Management ("GSAM"), a business unit of the Investment Management Division of Goldman, Sachs & Co. ("Goldman Sachs"), serves as the investment adviser to the Fund. Under the Agreement, GSAM, subject to the general supervision of the Trust's Board of Trustees, manages the Fund's portfolio. As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administering the Fund's business affairs, including providing facilities, GSAM is entitled to a fee, computed daily and payable monthly, at an annual rate equal to 0.70% of the average daily net assets of the Fund.

GSAM has voluntarily agreed to limit certain "Other Expenses" of the Fund (excluding Management fees, Distribution and Service fees, Transfer Agent fees and expenses, taxes, interest, brokerage, litigation, Service Share fees, indemnification costs, shareholder meeting and other extraordinary expenses), to the extent that such expenses exceed, on an annual basis, 0.02% of the average daily net assets of the Fund. For the year ended October 31, 2002, the adviser reimbursed approximately \$395,000. In addition, the Fund has entered into certain expense offset arrangements with the custodian resulting in a reduction of the Fund's expenses. For the year ended October 31, 2002, custody fee offsets amounted to approximately \$19,000.

3. AGREEMENTS (continued)

The Trust, on behalf of the Fund, has adopted Distribution and Service Plans. Under the Distribution and Service Plans, Goldman Sachs and/or authorized dealers are entitled to a monthly fee from the Fund for distribution and shareholder maintenance services equal, on an annual basis, to 0.25%, 1.00%, and 1.00% of the Fund's average daily net assets attributable to Class A, Class B and Class C Shares, respectively.

Goldman Sachs serves as the distributor of shares of the Fund pursuant to a Distribution Agreement. Goldman Sachs may receive a portion of the Class A sales load and Class B and Class C contingent deferred sales charges. During the year ended October 31, 2002, Goldman Sachs has advised the Fund that it retained approximately \$2,036,000, \$50 and \$20, respectively, for Class A, Class B and Class C Shares.

Goldman Sachs also serves as the transfer agent of the Fund for a fee. The fees charged for such transfer agency services are calculated daily and payable monthly at an annual rate as follows: 0.19% of the average daily net assets for Class A, Class B, and Class C Shares and 0.04% of the average daily net assets for Institutional and Services Shares.

The Trust, on behalf of the Fund, has adopted a Service Plan and Shareholder Administration Plan. These Plans allow for Service Shares to compensate service organizations for providing varying levels of account administration and shareholder administration services to their customers who are beneficial owners of such shares. The Service Plan and Shareholder Administration Plan provides for compensation to the service organizations in an amount up to 0.25% and 0.25%, respectively, on an annualized basis, of the average daily net assets of the Service Shares.

As of October 31, 2002, the amounts owed to affiliates were approximately \$878,000, \$216,000, and \$151,000 for Management, Distribution and Service, and Transfer Agent fees, respectively.

4. PORTFOLIO SECURITIES TRANSACTIONS

Cost of purchases and proceeds of sales and maturities of securities (excluding short-term investments) for the year ended October 31, 2002, were \$1,056,717,844 and \$455,880,213, respectively.

Forward Foreign Currency Exchange Contracts — The Fund may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date as a hedge or cross-hedge against either specific transactions or portfolio positions. The Fund may also purchase and sell such contracts to seek to increase total return. All commitments are "marked-to-market" daily at the applicable translation rates and any resulting unrealized gains or losses are recorded in the Fund's financial statements. The Fund records realized gains or losses at the time the forward contract is offset by entry into a closing transaction or extinguished by delivery of the currency. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

At October 31, 2002, the Fund had the following outstanding forward foreign currency exchange contracts:

Open Foreign Currency Sale Contracts	Value on Settlement Date	Current Value	Unrealized Loss
Great Britain Pound			
expiring 11/22/2002	\$ 55,061,408	\$ 55,680,976	\$ 619,568
expiring 12/16/2002	12,950,019	14,484,089	1,534,070
expiring 4/15/2003	6,995,000	7,735,955	740,955
Euro			
expiring 11/25/2002	179,228,432	181,290,704	2,062,272
expiring 12/16/2002	10,038,600	11,538,707	1,500,107
expiring 4/15/2003	27,327,417	30,319,472	2,992,055
TOTAL OPEN FOREIGN CURRENCY SALE CONTRACTS	\$291,600,876	\$301,049,903	\$9,449,027

The contractual amounts of forward foreign currency exchange contracts do not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments is meaningful only when all related

Notes to Financial Statements (continued)

October 31, 2002

4. PORTFOLIO SECURITIES TRANSACTIONS (continued)

and offsetting transactions are considered. At October 31, 2002, the Fund had sufficient cash and/or securities to cover any commitments under these contracts.

5. JOINT REPURCHASE AGREEMENT ACCOUNT

The Fund, together with other registered investment companies having management agreements with Goldman Sachs Funds Management, L.P., Goldman Sachs Asset Management International and GSAM or their affiliates, transfer uninvested cash into joint accounts, the daily aggregate balance of which is invested in one or more repurchase agreements.

At October 31, 2002, the Fund had undivided interests in repurchase agreements in the following joint account which equaled \$140,700,000 in principal amount. At October 31, 2002, the following repurchase agreements held in this joint account were fully collateralized by Federal Agency obligations.

Repurchase Agreements	Principal Amount	Interest Rate	Maturity Date	Maturity Value
Bank of America Securities LLC	\$1,000,000,000	1.93%	11/01/2002	\$1,000,053,611
Deutsche Bank Securities, Inc.	2,020,000,000	1.94	11/01/2002	2,020,108,856
Greenwich Capital	1,000,000,000	1.94	11/01/2002	1,000,053,889
J.P. Morgan Chase & Co., Inc.	1,300,000,000	1.93	11/01/2002	1,300,069,694
UBS Warburg LLC	1,512,500,000	1.94	11/01/2002	1,512,581,507
TOTAL JOINT REPURCHASE AGREEMENT ACCOUNT	\$6,832,500,000			\$6,832,867,557

6. LINE OF CREDIT FACILITY

The Fund participates in a \$350,000,000 committed, unsecured revolving line of credit facility. Under the most restrictive arrangement, the Fund must own securities having a market value in excess of 400% of the total bank borrowings. This facility is to be used solely for temporary or emergency purposes. The interest rate on borrowings is based on the Federal Funds rate. This facility also requires a fee to be paid by the Fund based on the amount of the commitment which has not been utilized. During the year ended October 31, 2002, the Fund did not have any borrowings under this facility.

\$ 133,363,349

\$ 133,363,349

7. ADDITIONAL TAX INFORMATION

The tax character of distributions paid during the fiscal year ended October 31, 2002 was as follows:

Distributions paid from:

Total taxable distributions

Ordinary Income

As of October 31, 2002, the components of accumulated earnings (losses) on a tax basis were as follow	's:	
Undistributed ordinary income — net	\$	1,594,812
Capital loss carryforward		(90,187,311)
Timing differences (income distribution payable and taxable interest on defaulted securities)		(4,945,316)
Unrealized losses — net	,	(391,529,090)
Total accumulated earnings (losses) — net	\$	(485,066,905)
Capital loss carryforward years of expiration		2007-2010

At October 31, 2002, the Fund's aggregate security unrealized gains and losses based on a cost for U.S. federal income tax purposes were as follows:

Tax Cost	\$1,950,651,219
Gross unrealized gain	36,751,496
Gross unrealized loss	(428,587,522)
Net unrealized security gain (loss)	\$ (391,836,026)

The difference between book-basis and tax-basis unrealized gains (losses) is primarily attributable to wash sales.

8. CERTAIN RECLASSIFICATIONS

In order to present the capital accounts on a tax basis, the Fund reclassified \$1,472,742 to accumulated distributions in excess of net investment income, \$4,582 to paid in capital and \$1,477,324 from accumulated net realized loss on investments and foreign currency related transactions. These reclassifications have no impact on the net asset value of the Fund. Reclassifications result primarily from the difference in the tax treatment of foreign currency gains (losses) and organization costs.

⁽a) Assumes investment at the net asset value at the beginning of the year, reinvestment of all distributions, a complete redemption of the investment at the net asset value at the end of the year and no sales charge. Total return would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

⁽b) Calculated based on the average shares outstanding methodology.

Report of Ernst & Young LLP, Independent Auditors

To the Shareholders and Board of Trustees Goldman Sachs Trust

We have audited the accompanying statement of assets and liabilities of Goldman Sachs High Yield Fund (one of the funds comprising the Goldman Sachs Trust) (the "Fund"), including the statement of investments, as of October 31, 2002, the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the three years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights for the periods ended October 31, 1998 and 1999 were audited by other auditors whose report, dated December 10, 1999, expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights. Our procedures included confirmation of securities owned as of October 31, 2002 by correspondence with the custodian and others. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights, audited by us, referred to above present fairly, in all material respects, the financial position of Goldman Sachs High Yield Fund at October 31, 2002, the results of its operations, the changes in its net assets and the financial highlights for the periods indicated above, in conformity with accounting principles generally accepted in the United States.

Ernst + Young LLP

New York, New York December 10, 2002

Trustees and Officers (Unaudited) Independent Trustees

Name, Address and Age ¹	Position(s) Held with Goldman Sachs Trust (the "Trust") ²	Term of Office and Length of Time Served ³	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee ⁴	Directorships Held by Trustee ⁵

This material is not authorized for distribution to prospective investors unless preceded or accompanied by a current Prospectus. Investors should read the Prospectus carefully before investing or sending money.

Goldman, Sachs & Co. is the distributor of the Fund.

The Goldman Sachs High Yield Fund invests primarily in high yield, lower rated securities which involve greater price volatility and present greater risks than higher rated fixed income securities. At times, the Fund may be unable to sell certain of its portfolio securities without a substantial drop in price, if at all.

The Goldman Sachs High Yield Fund's foreign investments may be more volatile than an investment in U.S. securities and are subject to the risks of currency fluctuations and political developments.
